

Are Mobile Payments on COTS (MPoC) solutions, Software-based PIN Entry on COTS (SPoC)[™] solutions, or Contactless Payments on COTS (CPoC[™]) solutions eligible for a P2PE Solution approval?

PCI SSC FAQ | Article 1457 | April 2024

No. The Mobile Payments on COTS (MPoC) Standard, Software-based PIN Entry on COTS (SPoC)[™] Standard, Contactless Payments on COTS (CPoC[™]) Standard and the P2PE Standard are all separate PCI SSC standards intended for unique use cases.

Note that devices used as part of an MPoC, SPoC, and/or CPoC Solution may coexist in the same merchant environment as devices used as part of a P2PE Solution.
